

Sole1

The Zykronix Solë scene controller unlocks the power of one-touch automation. Whether controlling your lights, shades and entertainment scenes or complex events involving multiple commands, the elegant Solë enables effortless control. Custom colors & button labeling helps personalize this state of the art family of scene controllers. Thin profile with proximity detection and screw-less faceplate makes Zykronix Solë scene controller family a beautiful addition to any automation Installations. Customizable graphics, color, backlight, status LEDs, capacitive keys and slider provide maximum flexibility for this device. Rather than having six switches or dimmers lined up on the wall, eliminate clutter with the Solë scene controller.
